

EMPLOYMENT OPPORTUNITY

CORBO Engineering continues to innovate and expand these horizons by offering its Atlantic Canadian clients an integrated service of engineering and architecture consultants for the private, institutional, commercial, and industrial sectors. We specialize in project management, mechanical-industrial design, naval, civil engineering, architecture, building engineering, electricity, renewable energy, automation, robotics, and instrumentation. We have offices in Caraquet, Bathurst and Moncton.

CORBO is currently looking for dynamic talents in a variety of areas of expertise to grow its team located at one of these three offices in Caraquet, Bathurst or Moncton.

Opportunity:

1. Mechanical design engineer specialized in machine design, with knowledge with hydraulic systems between 1 to 5 years of experience or,
2. Mechanical engineer with broad knowledge with either Solidworks or Inventor 3D design capabilities.
3. Technologist with equivalent experience.

KEYS RESPONSIBILITIES

Reporting to the Director of Mechanical Engineering, the candidate will hold the following responsibilities:

- Define the scope of the work and confirm the feasibility according to the client's requirements.
- Development and preparation of engineering models and drawings from preliminary concepts, sketches, engineering calculations, quotes, and other data.
- Writing reports, reviewing drawings and technical specifications within the scope of expertise.
- Develop schedules, material, and labor estimates as well as engineering service offerings.
- Work in collaboration with other engineers, architects, technologists, and external workers as appropriate.
- Management and coordination of all technical activities on assigned projects.

- Monitors work compliance with project requirements, applicable standards, and accepted engineering practices.

PROFESSIONAL REQUIREMENTS

- Undergraduate or graduate degree in specific field engineering and the opportunity to register as a professional engineer with the New Brunswick Association of Professional Engineers and Geoscientists.
- 1-5 years or more of experience in the field of expertise in question.
- Ability to work in a Microsoft Office 365 environment, and digital drawing software such as AutoCAD (REVIT, MEP, Civil 3D) or SolidWorks; or the equivalent.
- Written and oral skills in English and French. You will likely get clients with either languages.
- A clear understanding of safety, environmental and engineering codes and regulations related to the area of expertise.
- Solid organizational skills, capable of performing multiple tasks at once, managing conflicts, managing time, and working under pressure.
- Class 5 driver's license.

APPLICATION

CORBO offers a competitive salary and the following additional benefits:

- Medical, dental and vision insurance
- Pension plan contribution
- Sick leave
- Holiday
- Flexible schedule

Job type: Full time, 40hr/week

Travel will be required to complete tasks

Interested applicants can send their application to: info@corboinc.com

Only candidates selected for an interview will be contacted.

DIVERSITY DECLARATION

CORBO is an equal opportunity employer that recognizes, the value of a diversified workforce. All qualified candidates will be considered for employment on the basis of objective criteria and regardless of the following (which is a non-exhaustive list): race, color, age, religion, sex, national origin, disability, sexual orientation, gender identity, protected veteran status or other characteristics in accordance with applicable laws.
